Women In Tech - Our Impact on the ground

- Dr Cara ANTOINE, Women In Tech Netherlands
- Melissa SLAYMAKER, Women In Tech South Africa
- Claudia MENDES SILVA, Women In Tech Portugal

- The Global Community is represented by Persons of all Abilities – regardless of Gender, Race, Ethnicity, Class, Age or Sexual Orientation.

- The Focus is on 4 Primary Areas that are a call for Action: Education, Business, Social Inclusion and Advocacy. They aim to create Impact through Action to build Skills and Confidence, setting Women up for Success.

- They are on a Mission to empower 5 MILLION WOMEN AND GIRLS by 2030, Meeting 5 SDG's

- The UN Sustainable Development has set 17 Goals to transform our World by 2030. Goal#5 is to achieve Gender Equality and empower Women and Girls. The Tech Field is one of its Main Targets. Women in Tech® fully support the UN's Sustainable Development Objectives by contributing to 5 of the 17 Goals:

#4: Quality Education

#5: Achieve Gender Equality and empower all Women and Girls

#8: Promote Sustained, Inclusive and Sustainable Economic Growth, Full and Productive Employment and Decent Work for All.

#9: Industry, Innovation and Infrastructure

#10: Reduced Inequalities

- Their Core Values:

* Diversity and Interculturality

* Collaboration

* Creativity

* Love and Positive Energy

* Ambition

- For the past 4 Decades the Gender Gap in Tech has widened, with only 1 Woman in 5 People working in the Industry Today. Women in Tech® wants to change that.

Despite Decades of Progress towards Workplace Equality, Women remain underrepresented in the Technology Workforce. The Figures speak for themselves: according to Eurostat, just 17% of the People working in STEM (Science, Technology, Engineering and Mathematics) Roles across Europe are Female – and only 5% of Leadership Positions in the Technology Industry are held by Women.

Technology permeates every aspect of Our Society, defining the Way we live, build Products, Work and more. Not only does Technology drive our Economy but it invents our Future. Technology Products and Services are being developed and delivered based on the Perspectives of only One Half of the Population, and not designed with the Needs of Everyone in Mind. Women make up Half of Consumers and Technology Companies need to reflect this in their Workforce designing thos Products.

- Today, there are a Number of Initiatives that are working towards Bridging the Gender Gap in Technology. Most of these Initiatives are isolated and they focus on Specific Actions that cover a Part of the Problem but do not offer a Full Spectrum of Solutions.

Working Individually and Locally, Networks have less Impact. Obviously, they can make a Difference, but no Real Change can be done to invert the Process and Bridge the Gender Gap in the STEM Industry in the Long Term.
